

## 第4章 Variable

### 4.1 std\_limits

```
extern struct std_limits_ {
    long    str... /* Least maximum of string len. */
    size_t  id... /* Least maximum of ident len. */
    int     n_m... /* Least maximum of num of pars.*/
    int     exp... /* Least maximum of expr nest */
    int     blk... /* Least maximum of block nest */
    int     inc... /* Least maximum of include nest*/
    ...
} std_limits;
```

/\* The minimum tran...specified by the Standards. \*/

### 4.2 option\_flags

```
extern struct option_flags_ {
    int     c; ... /* -C option (keep comments) */
    int     k; ... /* -k option (keep white spaces)*/
    int     z; ...on (no-output of included file) */
    int     p; ... /* -P option (no #line output) */
    int     q; ... /* -Q option (diag to mcpp.err) */
    int     v; ... /* -v option (verbose) */
    ...
} option_flags;
```
