第2章　Structure etc

2.1　defbuf

```
typedef struct defbuf {
        struct defb...  /* Pointer to next def in chain */
        short       ...  /* Number of parameters        */
        char *      ...Parameter names catenated by ',' */
        char *      ...  /* Pointer to replacement text  */
        const char ...ro is defined in the source file  */
        long        ...  /*            at the line.       */
...
} DEFBUF;
```
